## Promotional Call Handler

Telephone On Hold's Call Handler system will provide a scheduled, promotional message to each of your callers prior to being transferred to your employees. It tracks inbound call volume and will reduce hang-ups and drive sales!

### **This system will increase your average ticket by 5% or more!**

- Sell more pizza specials (if you operate a pizzeria)
- Sell more teeth whitening (a dental office)
- Sell more gift cards (a salon day spa)

**The scheduled, highly targeted messages will quickly generate more revenue for your business. Also, the highly sophisticated system has a night message, a screen mode, music and messaging on-hold capabilities and much more! Plus, it answers multiple lines at once—freeing up your staff! The system is fully remotely operated from our studio office.**
