Internal Memory
&
320Kbps Support!

Message-On-Hold • Background Music Source

TelephoneOnHold.com Digital Messaging System

The *Messenger® USBi* is a state-of-the-art digital audio playback device designed to provide a continuous-play audio source for message-on-hold, background music, or any other audio application where high-quality audio playback is required.

Messages are loaded from a standard USB flash drive to the unit's 2GB internal memory. Once loaded, the USB flash drive can be removed for added security. This also means the *Messenger USBi* can be preloaded with audio from the dealer. To load new audio simply plug in a USB drive containing the new MP3 files and the *Messenger USBi* automatically loads the new program to memory, with *no reset needed*.

Audio content is easily managed by plugging the USB flash drive into a PC or MAC computer's USB port and "dragging and dropping" MP3 files to and from the drive. Your customers can receive new and updated message-on-hold or background music programs via e-mail or ftp and update the units themselves, saving you the expense of additional USB flash drives and the related mailing and tracking costs.

USB
Flash Drive
Included!

The *Messenger USBi* is also available with Sonocrypt Level 3, which encrypts the file itself making the MP3 file only playable on the *Messenger USBi*. This makes the distribution of music and messaging secure, ensuring against unauthorized playback.

The *Messenger USBi* features include:

- Loading via USB Flash Drive
- 2GB built-in memory for hours of audio
- No drivers or special software needed
- Playback quality up to 320Kbps
- Store up to 1024 messages
- Optional shuffle playback
- Built-in monitor speaker
- Sonocrypt Level 3 encryption (optional)
- LED status indicator
- Exceptional dealer support
- 5-year parts and labor warranty

Each *Messenger USBi* is built to exacting quality standards using state-of-the-art assembly equipment for outstanding reliability and years of dependable service.
